EDUCATION

Fordham University

B.S. Computer Science, Minor in Cybersecurity — GPA: 3.6

New York, NY

Aug 2023 – May 2027

EXPERIENCE

Incoming Product Management Intern

May 2026 – Jul 2026

Zinnia

Greenwich, CT

CIO Technical Assistant

Feb 2026 – Present

Fordham University – Office of the CIO

New York, NY

- Partner with cross-functional teams to translate application design requirements into user-facing interface.
- Support Product Specialists in RD feature requirement gathering, bridging technical and stakeholder perspectives.
- Provide testing support across staging and production environments, surfacing bugs and usability issues before release.

AI Training Analyst

Dec 2025 – Present

Handshake Fellowship

Remote

- Evaluated and benchmarked large language model (LLM) responses across domain-specific tasks to improve accuracy and reasoning quality.
- Developed structured prompts and assessment criteria to surface model strengths, weaknesses, and edge cases.
- Worked independently in an asynchronous environment while adhering to detailed specifications and quality guidelines.

Machine Learning & Automation Intern

Jul 2025 – Sep 2025

Datastrut AI

New York, NY

- Supported development of LLM-powered automation workflows by testing outputs and identifying performance gaps.
- Participated in cross-functional QA meetings with CEO and CTO, communicating progress and aligning technical work with business goals.
- Created internal demos and prototypes to evaluate new AI tools and inform adoption decisions.

Data Research Analyst

Apr 2025 – Dec 2025

Cooledtured

Remote

- Analyzed sales and customer behavior data to surface trends used in business and performance discussions.
- Owned data validation and quality checks to ensure accuracy and reliability of reporting datasets.
- Supported development of performance dashboards to monitor KPIs and communicate insights to stakeholders.

Data Research Intern

Aug 2024 – Dec 2025

Honor Education, University of Michigan

Remote

- Collaborated with researchers to evaluate AI-driven personalized learning tools, translating experimental results into actionable insights.
- Analyzed student performance data to identify trends that informed iterative model and platform improvements.
- Synthesized research findings and shared insights to support cross-team understanding.

Teaching Assistant

Jun 2025 – Aug 2025

Fordham University

New York, NY

- Assisted in teaching Computer Science I, guiding students through projects and problem-solving techniques.
- Led recitation sessions and adapted technical concepts for students with varying backgrounds.

LEADERSHIP & CAMPUS INVOLVEMENT

President, Computer Science Club

Aug 2025 – Present

Fordham University

New York, NY

- Lead a 50+ member organization hosting technical workshops and career events.
- Organized Fordham's first RamHack, coordinating logistics, participants, and external judges.
- Partner with faculty and organizations to align programming with student interests.

PROJECTS

MathPath – AI Math Tutor | *Python, Product Design, AI*

Jan 2026 – Present

- Built an AI tutoring tool that generates personalized learning paths based on student needs.
- Designed roadmap visualizations to track progress and identify knowledge gaps.
- Approached development through a product lens, prioritizing features and iterating on UX.

MTA Ridership Analysis | *Python, Jupyter Notebook, ML*

Apr 2025 – May 2025

- Analyzed ridership data to uncover usage patterns and forecast demand.
- Compared models to balance interpretability and predictive performance.
